Product Description

Condenser Borosilicate Glass - Laboratory Glassware Equipment

A condenser is an apparatus or item of equipment used to condense a substance from its gaseous to its liquid state).

In the laboratory, condensers are generally used in procedures where liquids brought into the gaseous state through heating,

With or without lowering the pressure though applications in inorganic and other laboratory glassware areas exist.

Features:

Long lasting performance

Durability

Lightweight

Accurate dimensions

Sleek design

Robust construction

Very high durability

Longer functionality

Auto-zero on Reservoir Plain with Stop-cock
