Product Description

Deflection Compass (Anti- Parallax Mirror And Sensitive Needle) - Physics Equipment

Housed in a plastic box with aluminium dial graduated in 0-90 degree four times, anti-parallax mirror and steel pivot.

The short magnetic needle and a light aluminium pointer designed for precise readings and maximum damping.

The compass box has a hollow circular cavity to fit tangent galvanometer stand or deflection magnetometer base.

Features:

Fine finished

Accurate dimension

Easy to use
