## **Product Description**

Dropping Funnels (Cylinder) - Laboratory Glassware Equipment
Dropping Funnels Cylindrical, open top, with Screw type PTFE Needle Valve
Stopcock, Stem with Cone.

A dropping funnel is a type of laboratory glassware used to transfer fluids. They are fitted with a stopcock which allows the flow to be controlled. Dropping funnels are useful for adding reagents slowly, i.e. drop-wise. This may be desirable when the quick addition of the reagent may result in side reactions, or if the reaction is too vigorous.

Capacity - 50 ml, 100 ml, 250 ml,
