Product Description

Human Torso With Muscles- Scientific Educational Model Human Torso

With Muscles- Human torso in 17 parts, this life size torso with open back is provides an exceptionally realistic reproduction of anatomical structures in their finest detail.

All of the body systems are represented with full accessibility. The left side exposes all significant superficial and deeper muscles with vessels and bones. The open back shows muscular layers as well as the vertebral column and associated nerve branches. A thoracic vertebra, including a section of spinal cord, is removable for close examination of its anatomical details.

Removable structures include the following:

Eye with optic nerve and extra-ocular muscles

Half of the brain, divided along the longitudinal fissure, showing internal structures and blood vessels

Lungs (2 parts each), showing the bronchial tree and vasculature.
