### Product Description

Magnetic Compass (aluminum body) - Physics Equipment

Magnetic Compass consists of highly magnetized needle in aluminum body.

An excellent compass for general laboratory use.

The dial shows cardinal points.

The needle is well balanced and is mounted in an aluminum case with glass top.

A compass is a navigational instrument for determining direction relative to the Earth's magnetic poles.

It consists of a magnetized pointer (usually marked on the North end) free to align itself with Earth's magnetic field.

The compass greatly improved the safety and efficiency of travel, especially ocean travel.

Nicely packed in card box.

Available in size - 12mm , 18mm , 25mm , 37mm , 50mm , 75mm , 100mm.
