Product Description

Microprocessor Water And Soil Analysis kit - Analytical Laboratory Equipment

Measurement Eight parameter pH, conductivity, TDS, DO, Salinity

MV, Temperature, Turbidity High Accurate & Stable User Friendly & Menu Driven Software

16x2 Line Alphanumeric LCD Display, Storage for 1000 Samples PC Attachment Facility Mains cum Battery Operated.

Fitted in briefcase. Soft touch membrane Keys.

Small volume and light weight finish. Allows for high usage convenience.

Allows simultaneous display of set and actual time, temperature.

Comes with built-in temperature calibration function.

Automatic fault detection and buzzer alarm function.

24V DC power supply input. Allows easy cleaning and disinfection.
