Product Description

Power Drier Or Tray Drier

These dryers are used to dry small and flat materials used in food industries for baking and drying food items. Our expert team members manufacture these dryers by making use of high-grade stainless steel and aluminum, supplied by our trusted vendors of the industry. These dryers are very easy to use and requires very low maintenance, therefore demanded by our customers across the industry. We are able to offer these dryers with fully insulated high-energy heating equipment which can reach temperatures up to 250 degree centigrade. To meet the various demands of our customers, we are able to offer the Tray Dryer in many specifications and sizes.

Labappara manufacturer, exporter and supplier of Tray Dryer for placement of product available with 6,8,12,24,48,96,192, aluminum Tray size 800 x 400 x 300mm. It has a temperature range of 50 to 250 deg.c. and 100 mm insulation is provided on all sides.
