Product Description

Rail Thermometer(6 inch aluminum body-pocket type)

Rail thermometer is a perfect option for DE-stressing, designed specifically for Railway track measurement with horizontal mounting on track wedge

These are available with us in a huge number of varieties that are creatively designed by our team of diligent designers.

We have been fabricated our assortment of thermometers as per the modern market requirements.

6 Inch long aluminium body-bottom one heavy duty magnet.

Ideal and most accurate for measuring temperature of railway tracks.

The Thermometer is mounted on a specially designed bent downwards Metallic Stout Frame with the Divisions & Figures printed on the Frame.

The Frame is fitted with Magnets on the reverse for better contact when mounted on Railway Tracks.

Applicability: Suitable for measuring Temperature of Railway Tracks.

Available In Range - 0 to 1000 C (Alcohol)
