

Refraction of Sound Apparatus

Product Categories: [Physics Equipments](#), [Sound And Waves Oscillations](#)

Product Tags: [physics lab instruments](#)

Product Page: <https://www.labappara.com/product/refraction-sound-apparatus/>

Product Description

Refraction of sound waves involves a change in the direction of waves as they pass from one medium to another. Refraction, or bending of the path of the waves, is accompanied by a change in speed and wavelength of the waves.

Feature :-

Reflection sound consists made of on wooden base.

And then available in regular & superior quality.

Reflection sound apparatus is superior on drawing board.
