## Product Description

### **Solar Water Pump - Scientific Laboratory Educational Equipment**

A kit is to demonstrate that solar irrigation could become economical and increased use of such system might be anticipated in future.

A mini water pump is powered by solar energy, (solar panel included) allowing you to run your pump all day long with no operating cost (no battery required)

The kit comes complete with two heads for a tranquilly beautiful water display up to 2-3ft high.

The panels are adjustable to receive maximum sunlight
