Product Description

Tripod Stands (Round) - Laboratory Equipment

A tripod is a portable three-legged frame, used as a platform for supporting the weight and maintaining the stability of some other object. Cast iron and mild steel legs, top painted, Zinc coated legs are bent outwards for stability.

A tripod provides stability against downward forces and horizontal forces and

movements about horizontal axes.

A laboratory tripod is a piece of three-legged equipment commonly used to conduct experiments in laboratories.

It is used as a platform to hold and support glassware such as beakers and flasks, during experiments.

Joints are nicely argon welded.

Feet are covered with rubber stumps.

Available in size -

A

6"X 4"

B

8"X 4"

C

8"X 5"

Feature -

Heavy cast Iron round shape.
